Re: Icynene Classic Max™ Best Practices

Dear Valued Icynene Dealers,

Please find attached a copy of Icynene's Best Practices guidance document for Classic Max™. In it you will find practices and procedures recommended by the Icynene Technical Department to help you achieve maximum yield and product performance with Icynene Classic Max™. Included are procedures for proper storage, mixing, temperatures and processing. This document should be reviewed by all members of your installation teams and a copy should be posted in all spray rigs.

If you have any questions regarding these procedures for Classic Max™ please contact Icynene Technical Services at 1.800.758.7325.

Best regards,

Robert Gilmour
Technical Services Manager, ICYNENE
